

Variable Genes

- 1 icosanoid receptor activity
- 2 cell adhesion molecule binding
- 3 S100 protein binding
cell adhesion molecule binding
- 4 amide binding
peptide binding
- 5 phosphatase binding
structural constituent of cytoskeleton
- 6 oxidoreductase activity, acting on a sulfur gro...
- 7 unfolded protein binding
heat shock protein binding
- 8 protein tyrosine phosphatase activity
protein tyrosine/serine/threonine phosphatase a...
- 9
- 10 antigen binding
serine-type endopeptidase activity
- 11 transcriptional repressor activity, RNA polymer...
SH3/SH2 adaptor activity
- 12 MHC protein complex binding
